

FLYNN ENVIRONMENTAL, INC.

Phase I Environmental Site Assessment Warehouse Akron, OH

Flynn conducted a Phase I Environmental Site Assessment of a warehouse site for a large bank. The Phase I was completed according to both ASTM and the lender's standards. Enough specific information was collected regarding past uses of the subject site and surrounding area to eliminate the need for further investigation (i.e. Phase II Site Assessment) and the bank was able to complete the loan without added time or expense.
